What is't, but want of love and dealing plain,
Makes the poor Client 'tend the Lawyers Train?
Who wins the day with t'other seems to moan,
Whilst they both strive, the third man gets the bone,
But if, by jars you think your selves t'advance,
Forake the Gown-man, follow *Mars* his dances

This Table sheweth the Moons Age every day in the year. First find the day of the Month in the first column, and the Month on the head of the Table, in the Angle or meeting place, you have the Age of the Moon, necessary for finding the time of high water.

A Table shewing the time of the Moon coming to the South, with the hour & min. to be added for finding the time of high water.

Moons Age	D coming to the South		Point of Comp.	Hours & min. to be added		The use of these 3 last Tables. The use of these three last Tables, I shall here briefly shew: If you would know the time of high water at any of those pla- ces mentioned in the second ta- ble, do thus: first find the day of the month in the first Table, which will point to the age of the Moon, (as before is taught) then repair to the second Table, and find the name of your Ha- ven, or Town, and see what number of the Compass answe- reth thereto, which had, repair to this Table; first find the age of the Moon in the first column, as the title will inform thee, and right against that in the next column, you shall have the hour & min. of the Moons com- ing to the South: in the next
	Days	H. M.		M.	H.

5	20	4	0	5	3	
6	21	4	48	6	3	
7	22	5	36	7	4	
8	23	6	24	8	5	
9	24	7	12	9	6	
10	25	8	0	10	6	
11	26	8	48	11	7	
12	27	9	36	12	8	
13	28	10	24	13	9	
14	29	11	12	14	9	
15	30	12	0	15	10	
				16	11	

col. you must find the number of the point of the Compass, before spoken of, and against that in the fourth col. you have the hour & min. to be added to the hours & min. of the Moons Southing, which done is the hour and min. of high water.

As for example, I would know at what hour it will be high water at London the 3d of January this year, I seek the age of the Moon in the first table, and find the Moon to be 10 days old; in the 2d. table against Lond. I find 5. with these numbers I repair to the last table, and first I find 10 the age of the Moon in the first column, and in the 2d I find 8 answering to 10, by this I know that the Moon is South at 8 at night: I seek the number 5 in the 3d col. which found points to 3 hours in the last col. which is to be added to 8, which tells you that it is high water at 11 of the clock. You shall find it to be full Sea at Bristol the same day at 45. min. after 2. The like may be done for any time, or place mentioned in the Table.

Books worth buying, newly printed by John
Streater, and to be sold by the Book-sellers
of London.

The Vale-Royal of England, being a Historical & Geo-
graphical Description of the County of Chester. Folio.

The Womans Counsellor, being a Description of the Dis-
eases incident to that Sex, with the Cures thereof: as also
of Barrenness of men or women, Octavo.

The Refinement of Zion, or the old Orthodox Religion
justified and defended. Quarto.

The History of the Wonders of Nature, treating Philo-
sophically and Physically of the Heavens, Elements, Meteors,
Minerals, Beasts, Fish, Fowl, Plants, and of Man. Folio.

The History of Magick, written in French by G. Naudeus
now Englished. A most excellent piece in defence of all the
wise men mentioned in the Holy Scriptures, and other Au-
thors. Octavo.

The Life of Piereskius, written by P. Gassendus, being
the sum of his great Attainments in Learning, Philosophy,
Physick, Chymistry, Policy, and Antiquity; the like not to be
read in any Author. Octavo.

The History of the Constancy of Nature, proving that
the world nor any thing therein, doth not decline or grow
worse. Octavo.

The Protestants Evidence, a most learned work, proving
that in the 16. several Centuries since Christ, there hath been
eminent and learned men that have professed the Faith as the
Church of England doth, Folio.

Also, A Theological Concordance of the Holy Scrip-
tures, of small price, and performeth as much as many large
Volums, very useful for all that desire to attain to Know-
ledge. Octavo.

January hath XXXI Dayes.

41
 The old year ends the new to usher in,
 And with high winds the new year doth begin,
 Whilst I thus mus'd, I thought I heard one say,
 I would 'twould blow oppression quite away:
 Unto this fancy, I fancy'd a reply.
 Oppression's not so light, nor wind so high.

January 1658.

Month Days
Ye *Heliconian* Nymphs! assistance lend,
My blunt and uneven Measures to amend:
And ye Celestial Bodys! with your Rays
Of Wisdom deck my head, and not with Bays:
Likewise ye earthly Gods, 'mongst us most high,
My abstruse lines (in favour) pray passe by.

Astrological Observations.

The season of the year admits of
no great matter of action in *Europe*,
but many and serious Consultati-
ons, the Commonalty willing to
pry into their serious consults, but
are not found worthy. Authority
lately vexed with too too urgent
Petitions, or pestered with Pamph-
lets: Domesticke differences, and
civil controversies, seemeth some-
what appeased, or at least little talkt
of; but wise men fear a Snake in
the grasse. The *Muscovites* may
justly fear the invasion of some
Potent foe, perhaps his *Tartarian*
neighbour proveth troublesome.
Some discontented party endeav-
our to disturb the Peace of *Ire-*
land, but (I hope) men better
satisfied, labour for a friendly re-
conciliation.

28 of the Month.

Astrological Observations.

This Month beginneth peaceably,
a pretty good Harmony amongst the
great ones; And we of the Commo-
nalty, glad to embrace quietness
upon any terms. There is (probab-
ly) a salving up some difference,
or healing some breach lately made
between the Scotch or Dutch and us,
or we become instrumental, to re-
concile Domestick broils among
them. Among our selves there is no
action or news considerable; what
arives from beyond the Seas is un-
certain: Probably some malefactors
be made exemplary about the latter
end of this Month; False Coiners,
or Clippers of mony catcht in their
knavery.

*Magna divinita lege nature composita
paupertas.*

March hath XXXI.

Four Squares with Phæbus entering the Ramme,
More like a Lion than a harmless Lamb:
And with their blustering Rayes they clear the air,
Disperse the Clouds, and make the wether fair;
Till frowning Saturn doth oppole the Sun,
Who soon undoes what e'other two had done.

March 1658.

40

Month Dates

The season of the year, doth all invite
To have a care of Natures chief delight :
'Tis good to cleanse your bodies and 'tis reason,
That you therein do observe natures season :
Of natures treasures, health of Body's best,
It is a Diadem worth all the rest.

Astrological Observations.

Pleasing missives arrive to our
Grandeers, & a general contentment
or at least silence, or some sandy
hopes for better times, seemeth to
possess the spirits of most men : but
rolls and untoward proceedings,
both at home and abroad, turns the
ide, & we are involved into a multi-
plicity of cares, and sad thoughts :
there is a probability of some discon-
tents between the Lawyer and Au-
thority. In some parts of *Europe* the
Clergy stickle hard to intrude them-
selves into civil consultations, and
endeavour to make the people wal-
low their frothy conceptions for pure
doctrines : From *Scotland*, *Holland*,
& the parts adjacent, we have new
seeming unwelcome, or not well re-
lished. The *Londoners* generally dis-
contented, complain for want of
trade, and without doubt they have
cause for it.

April hath XXX Daies

Now *Hermes*, Planetary Messenger,
Squares *Jove* himself, opposeth *Falciſer*,
With Loving *Sextile*, *Titan* haſtes to *Jove*,
And *Hermes* hate is turned into Love,
The other Planets, ſeemingly agree,
But ſubject are to change, and ſo are we.

April 1658.

Month dayes
News Books and Pamphlets swarm like Butter-flies,
Stuffing the heads o' th' credulous with lyes.
Whilst in the Conntry we, *quietus* sing,
The weather's good, a seasonable Spring;
But great men, day and night, in consultation,
Do mischief hatch (almost) in every Nation.

May hath XXXI Daies.

If you desire to know the state o' th' weather,
Consult with *Jove* and *Mars*, who're got together,
In the Celestial Crab, a crabbed Heaven,
Both squared by the highest of the seven,
You'll feel the effects, and truly I shall wonder
If this Month pass, without great store of thunder.

40

Month Days.

Great causes like events do presuppose,
The Cedars tall, each other do oppose
And though their lofty heads to stoop they scorn,
They're forc'd to yield unto a furious storm:
The lowest shrubs, from tempests free, do rest,
They, of all others, live compleatly blest.

Astrological Observations.

The first day of this Month there
happeneth a δ of Υ and δ in \odot
about four in the afternoon by the
calculation of *Echcladius*, but our
industrious, and no lesse ingenious
Country man *Vincent King*, hath
calculated, (by his *Harmonicon Ce-*
liste) the conjunction to happen
but 39 min. past eleven at night,
if so, there may be made observa-
tion thereof in the Western Angle,
if the aie be clear; *Mars* is eleva-
ted above *superior*.

About this time, there is an ap-
pearance, of changes, and great al-
terations in the Laws & Customs of
most Nations, matters of high con-
cernment controverted, much trou-
ble, and vexation attending most
Kings & Grandees of *Europe*, who
are very jealous of one anothers
actions, many are ready to protest
against each other, whilst their sub-
jects generally are (almost) mad
under the weight of oppression and
heavy burthens, *England* much con-
cerned in this Months transactions.

Nihil tam exasperat ferorem vul-
neris, quam ferendi impatientia.

June hath XXX Dayes.

The nimble *Hermes*, and the Lady of Love,
Now meet and both consent with friendly *Jove*;
Hermes hasts backward to *Phæbus* company,
Squaring with *Saturn*, who, with an envious eye,
Retorts their hate, spreads clouds soon after rain,
Pieris strives to please th' old charle again;

June 1658.

40

Month
Days
If it be so among the heavenly train,
Sometimes agree, and soon fall out again.
If in their Nobler mixtures, they thus change,
By various motions; should we think it strange?
That our corrupted Bodies in their stations,
Are subject to so many alterations.

Astrological Predictions

July 1658.

Month
Days

Know ye aspiring souls! who build your nett
Above the Clouds, and think your selves there blest;
That to be great is not the best estate,
Your Majesty subject to wavering fate:
Your slippery Thrones (if wise) may inform you all,
That when y^e are highest, y^e are nearest to a fall.

Astrological Observations.

Ambiguous intelligence arrives
from the Western parts of the
world, the last Term hath not bin
very pleasing to the Lawyer, whe-
ther there hath happened any refor-
mation, or material alteration like
to be in the Law, time will discover.
The Lawyer scarcely passeth with-
out the discountenance of authori-
ty, and the clamours of the discon-
tented Commonalty: In some pla-
ces the too forward Clergy receive a
curbe: we hear of the death of
some eminent person; Letters from
Rome, Italy, or the parts adjacent, gi-
veth us a more particular account.
Many Pamphlets, and things of
that nature fly abroad much to the
prejudice of Authority and aliena-
ting the Subjects affection from
them, discontented parties grow as
restlesse in seeking revenge as their
sufferings are endlesse.

40

*Ferocior plebs ad rebellandum, quam
bellandum: tentare magis, quam tu-
cri libertatem.*

August hath XXXI Dayes.

The *sun* and *Stillbone* in th'heart o'th' *Lion* joyne,
With *Jove* and *Saturn*, *Hermes* doth combine,
Conjoyns with *Mars*, so doth the *Queen* of love,
Entertain *Saturn*, and illustrious *Joves*
All this is well, and joyful 'tis to see,
Among the Planets, such a harmony.

August 1658.

Month days Things soon become familiar, which were strange,
We leave our furious rage, & our tents we range,
If once our thoughts are master'd then w^e are free,
Our captivated minds, nought better see :
Nine daies a wonder, nought so wonderful
At first, but time and frequency will dull.

31 with fair wether.

The last Month, yea the most part of the Summer quarter, hath proved a sickly time to the City of London: No considerable action seemeth to be discoursed on, yet the consults of this month seemeth much more considerable. The *Austrian Family* elevated unto a high pitch of consultation, sublime and lofty undertakings suddainly follow, most States and Princes of Europe, have an eye to their proceedings, happily they rout the French out of some of his Dominions; or do some valiant exploits upon some of their Enemies: a quiet and serene time amongst our selves, false Coiners, Cheaters, and such Rascals as busie as may be, I hope justice will make some of them exemplary: Idle and vain sports and exercises formerly accounted prophane and ridiculous, now countenanced, or at least tolerated. The Month ends with some domestick or homebred quarrels or disputations,

September hath XXX Days.

Five of the seven, this month transire the signe,
 O'th' ballance, *Sol* cuts the *Aequator* Line;
Chronos and *Hermes* in conjunction meet,
 And so doth *Sol* and *Mars*, whom *Jove* doth greet;
 But *Virgin Venus* and *Mercury* doth dare,
 Grave *Jupiter*, with a malignant Square.

September 1658.

Month Days

Ye proud and Potent *H* *fl*ors! whose desire,
Of *o*tain and Rule, hath kindled such a fire
Within your hearts, each other to subdue,
Your cause is Gods. we must believe tis true,
Success the proof subject to variations,
As your so many faithless declarations.

Astrological Observations.

Learning and learned men, much encouraged near this time; happily some course taken for the preaching or promulgation of the Gospel: establishing or maintainance for Ministers: ardent intentions and endeavours of the Clergy in general for establishing Orders and Discipline in the Church. The Grantees seem some willing, others flexible and yielding, others quite obstinate, *Obnoxius ducibus, et prohibere non ausis*: The people are in expectation of good from the Grand Senators: We have intelligence of great battels & slaughters of men in the Western parts, & in some places of *Europe*. Experience, and bad fortune, may convince some great Dons, that warlike success is no Hereditary Patrimony.

Una et ea vetus causa bellandi, est profunda cupido imperii, et ambituum, maximum gloriam in maximo imperio putant: Ruscere fœdus impius lucii furor, et ira præcepit.

October hath XXXI Dayes.

Now Sol and Saturn meet ; dark is the Skye,
Occasioned by Saturn's lowring eye,
Mars hastes to meet him, & with's blustering beams,
Disperse the Clouds : we like not these extreams.
Before their influence be over past,
We must endure, full many a furious blast.

Month
Days.

The winds are high, and every man doth know,
That they're full ill, that no man good doth blow,
Some men in troubled waters love to fish,
Are glad of mischief, and for troubles with:
But Lord let jars and discord amongst us cease,
Who know thy Son, the mighty Prince of Peace.

Month
Days

Domestick discord makes a harmony
Like Bells rung backward, whilst th'oppressed cry
To Heaven for vengeance, and to Mercies Throne;
Gainst Tyranny, the poor puts up their moan:
But he who stives their wearied bones to rest,
Of us beloved, and of God is blest.

Month Day

The year draws to an end, so doth my rhymes,
 From year to year, we wait for better times;
 Till time o're takes us with his silent foot,
 And with his sharp Sith cuts us off at th'oor,
 The times will better be, if we amend,
 And we more fit shall be to make A N E N D.

Astrological Observations.

As the season of the year (in our cold Climate) admits of no remarkable actions, so the Heavens seem to intimate nothing of moment, but consultations, some petty controversies, or discontents, (happily occasioned) by some Tax, or something of that nature. Our Senators likely to want money about this time, the people know who must furnish them: yet great hopes they have of supplies from forreign parts, and rich prizes from their naval forces: It seemeth probable to me, and the Heavens seem to intimate some great alteration, viz. sad and grievous troubles, want and mortality (occasioned by war) in some of the Spaniards Western Plantations.

The year ends with Pamphlets, or complaints, vexing Authority, from some discontented parties.

An explanation of the Almanack.

Each month hath 2. pages, the left hand page hath 6 Columns, the 1. sheweth the month daies, 2. week daies, 3. festival daies, & twice in the month the latitude of the Planets; 4. the daily motions of the Sun, 5. of the Moon, 6. the Lunar Aspects, where note that m. standeth for morning, n. night, a. afternoon, b. beforenoon, o. at noone. In the right hand page is 3 Columns, the first month-daies, 2. the Planets Aspects amongst themselves, the Lunations and change, of weather, the third Monthly Observations.

The use of the two following Tables.

The first Table serveth for the first six months, the second for the last six months, each Table containeth 9 Columns, The first sheweth the Months, the second every fifth day of the month, 3. the houre and min. of Sun rise, 4. Sun setting, 5. the length of the day, 6. the length of the night, 7. the Planetary or unequal hour by day, 8. the Planetary hour by night: and here note, that the artificial day (from Sun rising to Sun setting) be it long or short, is divided into 12 h. and as many in the night. The last Column sheweth the quantity of twilight morning and evening. Seeing the ☉ descends not 18. d. under the Horizon in our Meridian, from the 12 of May to the 12 of July, we conclude it all twilight or no perfect night in that time.

Astrologickall Predictions for the year of
CHRIST, 1658.

MY unfledg'd wings, and fettered feathers keep:
My Genius low, I dread th' Icarian deep:
I dare no be so bold, as touch the reine,
Of the unruly, pamper'd Solar Train:
I count my self most safe i'th lowest Sphear,
To soare unto the highest I most fear.
I've trac'd the Planets motions through the Skies,
And quored general Judgments of the wise,
But durst not to particulars descend,
Lest I be judg'd to flatter or offend:
Lest lofty Saturn with his frowning looks,
And zealous Jove in anger damme my Books,
Lest fiery Mars with's sword should me correct,
And Kingly Sol in anger me aspeere,
Lest Venus wantons, in their Songs me flout,
And wits Mercurial blaze my name about,
Lest Lunn vulgar, Zote, and Momus too,
Do say, I meddle with what I've nought to do,
I labour to prevent all scribbling Quacks,
And please all those that buy my Almanacks.

} 40

I Shall not waste time and blot paper, in en-
deavouring to probe, or in recirring the opini-
ons of Authors, to probe the time of the Crea-
on of the world, or how many years have elap-
sed, from the beginning of all things to this pre-
sent year 1658, (it being an Herculan task)
neither Christians, Jews or Heathens, giving
us any satisfaction in the point controverted,
miserably dissenting one from another in their
computations, whilst Aristotle and the Epicures
will not believe it had a beginning.

Therefore (passing by those irreconcilable
differences) we come to the season of the year, or

par-

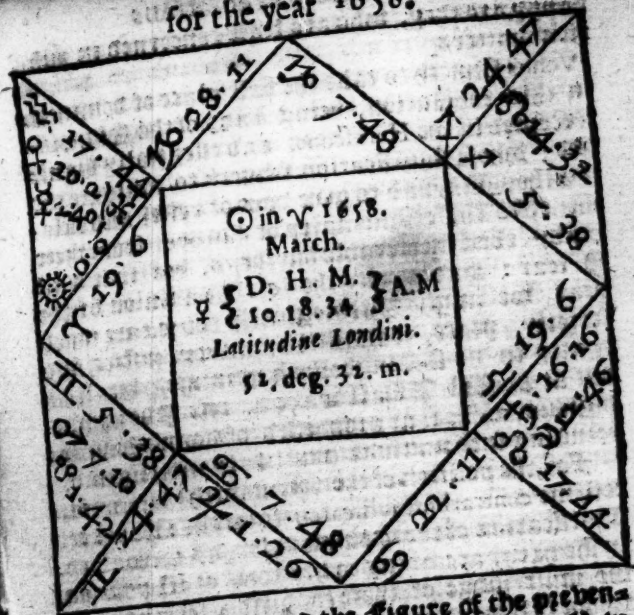

Astrological Predictions

particle of time of its birth, or structure, which we conclude to be at the Spring, or Vernal Equinox; and of this opinion, hath been the ablest, and most famous of Divines, Astronomers, and Geographers in all Ages. And, if we credit antiquity, the Patriarchs observed this season, which, without doubt, was restored to the children of Israel again, at their departure out of Egypt, and institution of the Passover, at which season also David was anointed King over Israel, and Jesus Christ suffered at Jerusalem; which season takes its beginning, at such time as the Sun, that glorious Lamp of Heaven en-tereth the Celestial sign Aries, and, with his benevolent rays, and natural treasures, indueth all Vegetables and Animals upon earth with a prolifical virtue; and beautifieth the earth, with an innumerable issue, of green herbs and plants, according to that of Moses, Gen. 1. 11, 12.

This then being the season of the worlds Birth, Astrologers (upon good grounds) have thought it meet, to make the figure of the Suns revolution, or annual return to the first scripture of Aries, the Vernal Equinox, and principal ground of their Astrological judgments, having regard to the Suns ingress into the other three Cardinal points, with Eclipses of the Luminaries, and Configurations of the Superiour Bodies, &c.

The Vernal ingress, this year, in the Meridian of London, according to Eickstadius, happeneth March the 10th at 34 min. past 6 in the morning; at which time the 19th degree of Aries, the degree of the Suns exaltation, and of the great Eclipse in March 1652, ascendeth our Horizon, as you may observe by the following Figure.

for the year 1658.

In this Figure and the Figure of the prebentional Full Moon, and postbentional New Moon, Saturn, Jupiter, Venus, and Sol, seem to contend for dignities; not unlike to many of the Grandes and Potentates of Europe, whose restless and unbounded ambition, hath so far took root in their hearts, (not contented with Kingdoms) they would each enjoy the whole world: so many Planets essentially dignified in the Sch me, signifieth profound consultations, high and admirable transactions.

But seeing the angles of the three figures are moveable, and all the Planets immoveable and common signes; it signifieth their affairs, as unfixed, uncertain and moveable, that at sometimes the wisest heads are at a non plus to consider which way to take for their own security; happy

Astrological Predictions

happy are they, who are least concerned in publick matters.

Venus seemeth to take the first place of dominion in this revolution, being Lady of the Sign, intercepted in the Horoscope, and essentially dignified; whose signification seemeth to mitigate the sad thoughts, and to give hope of relief and easement, to the commonalty of Europe, from their heavy, even intolerable burthens, but that's all I fear: Had Venus the sole Dominion of the year, we might Astrologically conjecture much felicity, peace, tranquillity, mercy, justice, and equity in most Kingdoms & Common-wealths, but at present I shall waive it, lest I be as prodigious, as he that prophesied of dooms-day, for bringing such unusual & unlikely intelligence.

For the position of the Moon with Saturne forceth me contrarium judicare: for if the Moon hath signification of the Commonalty, as undoubtedly she hath, according to her well or ill position, we must judge of their condition. She have the Moon falling into the sixth house, much afflicted by the propinquity of Saturn's body, Si fuerit Luna debilis et peregrina, et applicuerit infortunius, et illa infortunia sint firma; significat populum malum statum, et casum, depressionem et debilitatem in suis negotiis, defectum sui victus et lucri, et multas infirmitates in corporibus, et occasiones, quae accidunt eis, Haly pag 365. In English thus, If the Moon be weak, and peregrine, and apply to the infortunes, and they be strong, it signifieth the evil estate and condition of the people, their dejectedness and debility in their affaires, want of trade or profit thereby, and things necessary, many infirmities in their Bodies, and such like accidents.

He farther saith, Si illud infortunium cui appli-

for the year 1658,

est Luna fuerit Saturnus, accident eis infirmitates frigida, et de natura Saturni, quæ erunt causæ mortis: If Saturn be the infortune unto whom the Moon apply, men shall be afflicted by cold diseases, such as are of the nature of Saturn, bringing mortality along with them.

We cannot then in reason predict much good to the Commonalty during this revolution: for, if God direct it not, we may expect an Epidemical disease afflicting the people on the one hand, and an Egyptian servitude oppressing the rest; for Saturn, who afflicts the Moon, is Lord of the tenth House, the House of Kings and Supremacy, or supreme Officers, who in many places of Europe, are grown as great and unlimited in power, as in ambition and pride, they are as likely to prove troublesome to each other as burthensome to their Subjects, Quando Saturnus fuerit retrogradus in libra significat lites inter reges, qui sunt à parte occidentis, et septentrionis, when Saturn is retrograde in Libra, it signifieth war, and contention, between the Western and Northern Princes. Again, quando Luna est juncta cum Saturno, augetur potentia scribarum: When the Moon is joined with Saturn, Clarks shall enlarge their power or employment; I know not what is the scope of this Aphorisme, unless it hath signification of new Courts or Offices to be created, whereby Clarks may encrease their power and multiply their fees: For Mars and Cauda draconis in the second House, speaketh but heauy things to the people, viz. that little profit or benefit they shall reape by their hard labour and industry; that more hard and grievous impositions will be laid upon them, and the Common-wealths Treasury much exhausted; (so many Locusts and Caterpillers there are in

most

Astrological Predictions

most Nations and Kingdoms of Europe, who
 fer be for nothing else but to debaire the fat of the
 Land) to ich may probably be the feze-runne
 of much heart-burning, if not of new commoti-
 ons, among the Commonalty in some places of
 Europe, occasioned by their misery and poverty.
 Bonatus saith, Si Mars fuerit in secunda, significat
 afflictionem substantiae, per iniustitiam, et absque ra-
 tione: et erit paupertas et indigentia causa, indu-
 cens eos ad hoc faciendum, et conturbabuntur fami-
 liares atq; ministri contra dominos suos, seu illos,
 cum quibus habitant vel morantur: If Mars be in
 the second House, it signifieth the taking away
 of mens goods by injustice, and without giuing
 a reason wherefore; and that poverty and ne-
 cessity shall be the cause inducing men to these
 actions; Seruants shall disquiet their Masters
 or Rulers, and familiars trouble each other &
 probably the ruin and decay of many may put
 them upon desperate, and unwarrantable cour-
 ses to get a livelihood, which may be the cause of
 many robberies, or taking mens goods away by
 violence: as also a general complaint among
 the European Commonalty, against their Su-
 perious, who, to aduance their private and co-
 uetous ends, and enlarge their Dominions, have
 engaged themselves in wars with their neighbou-
 ring Nations; and to maintain the same, (pre-
 tending necessity) with an unjust and cruel hand
 oppresses the people, which oppressions and heauy
 sufferings in some places, will enrage & engage
 the people to such an height of fury and madness,
 as to disturb the peace of their lofty Sincrops,
 as the ☿ in II denotes. Si cauda fuerit in Gemi-
 nis, significat, quod exalabuntur rustici, et calpiter-
 hunt, et salient contra regem, et quod deludent
 eum: et insurgent contra milites atq; diues ejus five
 vicarios

for the year 1658.

vicaries: that is, if the Dragons tail be in Gemini, it signifieth, that rusticks, or the common people, shall be exalted or elevated, and spurn against, despise and scorn the King, or Supreme Magistrate, rise against, or oppose his forces, Officers, or Deputy.

I must be brief, being enjoyned by the Staro-ner, to wind up my Astrological Observations into one sheet of paper, We have Jupiter near to the Culpe of the fourth House, and not unwelcome to the Farmer, who somewhat mitigates the effects of Saturn's malicious influence: he signifies increase of estate to some by the death of some friends, others by hidden Treasure, &c. but these things only belong to such, whose Qualities are correspondent with the aforesaid configurations. We have Jupiter aspected by Mercuries Trine, which (as Haly saith) significat quod habebunt homines multa verba et causas pro lege; whether this hath signification of new Laws, or reforming the old, or more then ordinary Law Suits let time be the interpreter. I must not omit the signification of the ☉ being exalted in the degree ascending; his position in the twelfth House signifieth, diminutionem atq; depressionem divitum et magnatum, nobilium quoq; et eorum mortem: eorumq; dignitatum oblationem, et injurias eis, illatas ab ignobilibus: the Decay or fall of many rich and great persons, also the death of noble and eminent men: losse of their places of honour, and many injuries offered them by the ignoble and men of low condition.

The square of the Sun to Jupiter cannot passe without some petty controversies, and probably some discontent taken, or rather given by the Aristical Heroes, to those people under the regiments of Cancer, whether the change or alteration

on

Astrological Predictions

on of some old Law, or Custome, or institution of
 some new, either Ecclesiastical or Politicall, do
 cause some heart-burnings, or discontents among
 those people, let them better inform: I shall no
 farther expatiate, but come to the Summer
 Quarter:

I shall take but a brief survey of this Figure, in regard he hath almost the sole dominion of the year, and of his signification I have already touched: In this figure we have him stationary to direction, most vigorously darting his evil influence, and malicious beams on mankind, Mercury Lord of the Ascendent in Cancer stationary to retrogradation, impeded by the Quadrant Aspect of Saturn: Dominus ascendentis et Luna significans vulgi, in revolutione anni, quibus impediti fuerint, significant impedimentum venturorum

curum super homines; in personis et rebus eorum, secundum quantitatem inimicitatis: The Lord of the Ascendant and the Moon, hath signification of the affairs of the vulgar, in the revolution of the world; if they be impeded, it signifieth some impediment or disturbance to men in their persons, or goods, according to the quantity of the impediment. Albumazar addeth, Si fuerit impedimentum ex Saturno, erit febris ex cholera nigra, et mors: if Saturn be the afflicting Planet, he stirs up black choler; causing dangerous, and mortal feavers: the conjunction of ♄ with the fortunes, and the Moon in Trine to them all three, doth somewhat interpose the venomous influence of Saturn, or else upon sure grounds I should predict a very sickly Summer.

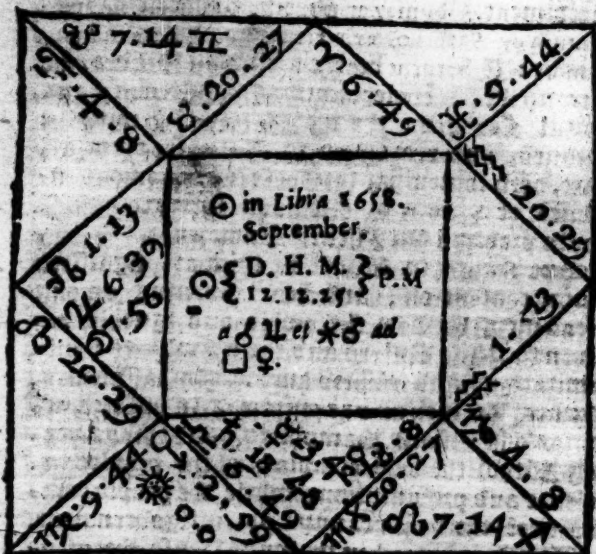

But Saturn in square to them all, signifieth strife, contention, and heart-burning among great men, between the noble and ignoble, between supreme Rulers and their Subjects: dissimulation, and falshood among Embassadors, Agents, or such as are employ'd in publick negotiations: many Pamphlets, and things vexing Authority, who complain of the peoples insolence and presumption, while the people complain of their Tyranny or misgovernment.

The Dragons tail in the tenth House, threateneth great persons with disturbance and many dangers, Si cauda fuerit in decimo significat impedimentum Regum atque Nobilium, seu magnatum, et diminutionem honoris eorum, seu dignitatum; quoth Bonatus If the Dragons tail be in the tenth House, it signifieth troubles to Kings, Nobles, and great persons, with the losse of their honour, and dignities. Albumazar saith, significat depositionem, et pericula, et peregrinationem sive calum, that it signifieth many dangers, banishments,

Astrological Predictions

displacing, and ruin to great persons in many Nations.

Saturn in square to ♄ ♀ and Mercury, and the Moon beholding them from an angle and out of a moist sign, surely will produce much moisture, a dripping season, with storms of thunder and high winds.

We have, in this figure. ♄ and ♀ in the East Horizon, near the Cuspis. Bonatus saith, Quando Jupiter fuerit in revolutione in prima, significat in anno illo, quod reverebitur unus alter in secundum quod decebit revereri unumquemque juxta suum esse, et servabunt honestatem, et pulchritudinem, et mundiciam arque fidem, et religionem, et exercebunt tempus in disciplina et ratione, et erit finis intentionis eorum, exerceri in his quae spectant ad salutem animarum. When Jupiter in a revolution, shall be in the first house, it signifieth, that

for the year 1658.

that in that year, one man shall reverence and honour another, according to their degrees of merits, that men shall possess honestly, upright dealing, Faith and Religion; they shall spend their time in discipline and good doctrine, and their ends and intentions shall be to exercise themselves in those things which tend to the salvation of their souls. So far honest Bonarus, who, if he had lived in this age, would have been afraid to have delivered such a judgment, the contrary of which being in so much request and praise among us; I need not show you wherein (no rational man being ignorant thereof). Is not honesty, just and upright dealing, faithfulness, things only in name amongst us, Nigro similes Cygnus and is not Religion very much (yea too much) used but as a cloak and cover for all manner of dishonesty, fraud, deceit, countenancing cheating, lying, and dissembling, and what not, among all sorts of people from the highest to the lowest? But I return & diverticulo in riam, I question not but some of these things now spoken of, will (in some measure) come to passe near this time: that is, Religion, honesty, good discipline much talked of, great sticking amongst the Clergy for a Church Government, or a mode of discipline, and a form of Catechism for the education of youth, in the chief points of Religion, and good manners; And I wish that the ministry may make it their work and chief end to glorifie God, and to save souls, and learn of their Lord and Master Christ Jesus, humility, meekness, and lowliness of Spirit; I believe that religious disputes, and matters Ecclesiastical, take up much time, and claim the preeminence of our Grandees consultations.

The Conjunction of the Moon and Jupiter;
Sol

Astrological Predictions.

Sol and Mars Saturn and Mercury, without doubt
will raise high and turbulent Storms of wind
much prejudicial to the London Merchant, who
I believe hath not well prospered all this year
affairs at home and abroad crossly proceeding
but wanting further consideration of the figure,
I come to the Winter Quarter.

I shall be brief herein, seeing there are not many
things considerable in this figure: Mars Lord of
sign ascending is in Sagittary, in 8th House in
conjunction with ♄: Si fuerit in Sagittario Mars,
significat bellum futurū, in partibus occidentilibus,
et quod erit paucitas vis, in partibus illis, et erit ma-
lam impedimentum, atq; mors in habitationibus illa-
rum regionum, et in negotiatoribus: &c. Mars in Sa-
gittary signifieth war in the western parts, the in-
habitants in a weak condition, sad and grievous
troubles, mortality in those Regions to the inha-
bitants

for the year 1658.

beasts, also to strangers, or factours there resident: probably this may have relation to the Western Judges, or some of the Spaniards Dominions adjacent, who by this time have in some measure tasted of the valour and fury of a potent foe; but to return, not minding to straggle so far from home, he signifieth, Coughs, sore eyes, Worms in children, suddain deaths, Tertian Fevers, Strong and violent, notable robberies saith Albumazar. We have Saturn Angular, and Lord Paramount of the four revolutionary figures, ♄ in the ninth in ✕ to him. Many of the Clergy continue very active, and importunate with Authority, about imposing uniformity upon the people, or confirming some Ecclesiastical institution. We have Venus in the 12th House in ♀ to ♃ in the 6th, and the ♃ in the 7th in ♀ in ☐ to both, threatens many diseases (so the female sex especially) proceeding from choler and excess of blood v.z. diseases of the womb, and private members, back, sides, ribs, heart and breast, &c. the Stone, Strangury, and Piles, &c.

Of Eclipses happening this year. 1658.
TWICE this year will the Sun be eclipsed, but neither of them will be visible unto us, they are both Central, therefore the Moon cannot be eclipsed this year.

The first Eclipse of the Sun happeneth on the 22 of May, near three in the morning, visible to those people, the Longitude of whose Country is 136 deg, 53 min. and North latitude 27 deg. such are those that live near Bengala in India, and about the Philippine Islands, where it will appear almost total.

The other happeneth the 14 day of November, at 11 at night, this Eclipse will not appear to

us, because the Luminaries, are at that time beneath our Horizon: It is a great Eclipse, and will appear to those people that inhabit beyond the Equator Longitude, 208 Deg. 3 min. with South Latitude 17 deg. in the Islands of the western Ocean, viz. in the Islands de los Tubarones, & de los Mongos, &c. to them it will appear total, the duration from the beginning to the end three hours, and a half.

Farewel, my little Book, think it not strange,
That thou throughout the Nation must range
To every Fair and Market: that's not all,
Take up thy standing on the Pedlers Stall.
Smile not on one, nor on the other frown,
Submit to th' hand of Gentleman and Clown:
Shun foolish anger seek no revenge at all,
Regard not he who dare thee lyar call,
Though fools thee scorn, the wise will soon desery
The difference 'twixt errour, and a lye.
Scorn thou no man, to all be dutiful,
Shew them when Luna change, when she's at full,
When they would know the sign, assistance yeild;
What time is best their Pigs and Lambs to geld.
And marmur not, though thou account must make
How long 'twas since the brown Cow Bull did
Or when the Sow took Boar: be diligent, take,
That thou shouldst serve them all, it's my intent,
And when thy year is up, forbear to prate,
Although they throw thee by, as out of date;
Be patient, though at length thou'rt rent & torn,
And to the House of Office brought in scorn:
And though the good wife, under Pyes thee put,
Do thou not dare to call her dirty slut.
Or else perhaps good fellows may the use,
To light Tobacco: do them not abuse;
For know what e're beginning had or birth,
Must at the last return unto the earth:
If every thing doth to its Center tend,
Surely poor Almanacks must have **A N E N D.**
